

# Security Policy

**This policy is stating our position regarding security and management of operational risks. The policy strives to safeguard security for our customers, employees, assets, information and not least our trustworthiness and competitive ability.**

The policy, is the top steering document around security, and includes information security, physical security, fire safety, personnel security, supply chain security and crisis management.

The policy includes all staff, suppliers, external consultants, business partners and business within Crane AB. This policy is realized and accomplished thru:

- Systematic risk management identifies all valuable assets and associated risks that can be a threat against our business idea, vision, goals and core values.
- Safeguards and develops risk preventive work to balance and minimize unacceptable damage, losses and negative business impact. This shall be done with cost effectiveness and well adapted risk and security solutions.
- Our staff and suppliers complies with legal requirements and company policies and procedures, instructions relevant to security.
- Secure that all staff, suppliers and others working on our behalf are loyal and dependable from security perspective and has relevant training and resources to maintain a high risk- and security awareness.
- Security should be a natural part of the daily work and shall therefore be implemented in normal business operations.
- Internally and in cooperation with our customers safeguard a good and well adapted security level in our business that reflects on our customers and external stakeholders requirements.
- Make sure that reporting, investigation and monitoring of security incidents and circumstances that can have negative impact on our own or our customers business is maintained.

The work with security and risk management shall be done with great transparency and commitment.

Procedures and other information around security is found in Cranes integrated management system.

Cranes Security Policy is approved and decided by the top management in Crane AB and must be revised at least every year or when a significant change is done.
